

Benefit Plan Help

Business guidance for the Benefit Plan screen

Screen context	Value
Business entity	Benefit Plan
Dataverse logical name	maftagsc_benefitplan
Domain	Benefits
Ownership / sensitivity	Organization-owned reference data

Purpose

Defines an organization-offered benefit, its provider, category, effective period, and standard Employee and Employer costs.

All names, dates, amounts, and identifiers in examples are fictional and intended for training.

Understanding Benefit Plan

Defines an organization-offered benefit, its provider, category, effective period, and standard Employee and Employer costs.

Use this screen when

- Publishing an approved benefit offering
- Creating a new plan-year version
- Providing a Plan for Employee Enrollments
- Retiring an offering after its effective period

Do not use this screen to

- Do not use a Plan as an Employee election
- Do not overwrite historical terms or costs for a new plan year
- Do not create a Plan before provider, dates, and costs are approved

Contextual agent grounding

When entityName is “maftagsc_benefitplan”, treat this document as the primary entity-specific source. Use it together with HR-Agent-Sidecar-Benefits-Administration-Process.pdf. Do not infer that planned Model-driven App automation, security roles, or the Copilot side pane are deployed until implementation is confirmed.

Who does what

Business role	Responsibility on this screen
Benefits administrator	Creates and maintains approved Benefit Plans.
Benefits/process owner	Approves plan terms, dates, and contribution basis.

Business field guide

Field	Business meaning	How to use it
Benefit Plan Name	Clear business name including plan year when appropriate.	Required primary name.
Plan Code	Stable plan identifier.	Required; use an approved unique code.
Provider	Organization supplying the benefit.	Required.

Field	Business meaning	How to use it
Benefit Category	Medical, Dental, Vision, Life Insurance, Retirement, or Other.	Required.
Description	Plain-language summary of the offering.	State the contribution period when useful.
Employee Cost	Standard Employee contribution.	Use the approved contribution period.
Employer Cost	Standard Employer contribution.	Use the same contribution period.
Effective Start	First date the Plan is available.	Required.
Effective End	Last date the Plan is available.	Leave blank only for a genuinely open-ended Plan.
Status	Whether the Plan is available for use.	Activate only when enrollment-ready.

Related business records

Related record	Relationship to this screen
Benefit Enrollments	Employee elections reference the applicable Plan version.

Worked example

The following fictional Benefit Plan record demonstrates a complete business scenario.

Field	Example value
Benefit Plan Name	Contoso Choice Medical 2027
Plan Code	MED-CHOICE-2027
Provider	Contoso Health
Benefit Category	Medical
Description	PPO medical plan; costs shown per month
Employee Cost	\$185.00 per month

Field	Example value
Employer Cost	\$525.00 per month
Effective Start	January 1, 2027
Effective End	December 31, 2027
Status	Active

Questions users commonly ask

Question	Business answer
Why create a new Plan for a new year?	It preserves historical terms, costs, and effective dates used by existing Enrollments.
Does changing a Plan update existing Enrollments?	Do not assume so. Enrollments preserve the Employee's election and contribution for its coverage period.
Can an inactive Plan be selected?	No. Use the active Plan whose effective period covers the Enrollment.

Data quality and privacy checks

- Confirm that the record belongs on the Benefit Plan screen and is not a duplicate or a different business concept.
- Use approved lookups and choice values instead of typing alternative labels into notes.
- Enter only the minimum personal or financial information required for the business process.
- Preserve status and historical records; do not silently overwrite completed business events.
- When escalating an issue, share the record URL/ID and field name—not unnecessary sensitive field contents.

Companion process documentation

Use this entity help together with: [HR-Agent-Sidecar-Benefits-Administration-Process.pdf](#). The process document explains sequencing, responsibilities, approvals, exceptions, and cross-entity effects.

Agent response boundary

What the contextual agent should do

Answer in business terms for a user currently viewing Benefit Plan. Explain field meaning, proper use, related records, validation, and the applicable business process. If a question requires organization-specific policy, access rights, or confirmation that automation is deployed, state that limitation and direct the user to the appropriate HR or Power Platform owner.
