

Employee Help

Business guidance for the Employee screen

Screen context	Value
Business entity	Employee
Dataverse logical name	systemuser
Domain	Organization
Ownership / sensitivity	Dataverse platform User record; access is governed by platform security

Purpose

Represents an internal worker and provides the authoritative identity and organizational assignment used by HR transactions.

All names, dates, amounts, and identifiers in examples are fictional and intended for training.

Understanding Employee

Represents an internal worker and provides the authoritative identity and organizational assignment used by HR transactions.

Use this screen when

- Onboarding an Employee after the authorized identity exists
- Assigning or changing Manager, Position, or Department
- Recording Hire Date and Employment Type
- Referencing a person from Time Off, Expense, or Benefit records

Do not use this screen to

- Do not create a custom duplicate Employee record
- Do not type an Employee name into notes instead of selecting the Employee lookup
- Do not delete a departed Employee to remove history; use the governed disable process

Contextual agent grounding

When entityName is "systemuser", treat this document as the primary entity-specific source. Use it together with HR-Agent-Sidecar-Employee-and-Organization-Process.pdf. Do not infer that planned Model-driven App automation, security roles, or the Copilot side pane are deployed until implementation is confirmed.

Who does what

Business role	Responsibility on this screen
Identity administrator	Creates or synchronizes the identity and Dataverse User.
HR administrator	Maintains approved HR and organizational fields.
Manager	Confirms reporting relationships and raises corrections.

Business field guide

Field	Business meaning	How to use it
Employee ID	Stable workforce identifier.	Use the approved HR identifier; search before creating or correcting a record.
Full Name	Employee's display name.	Directory-controlled; do not overwrite to represent another person.
Primary Email	Business email address.	Directory-controlled and useful for

Field	Business meaning	How to use it
		identity matching.
Mobile Phone	Business contact number.	Enter only when authorized and needed.
Manager	Employee who supervises this Employee.	Use the standard Manager lookup; no direct or indirect circular relationships.
Position	Organizational role held by the Employee.	Select an approved Position record.
Department	Organizational unit to which the Employee belongs.	Select the approved Department/Business Unit.
Hire Date	Date employment began.	Date only; enter from the authoritative HR event.
Employment Type	Full Time, Part Time, Contractor, or Intern.	Select the approved business classification.
Enabled	Whether the User can operate in the environment.	Disable through the governed identity/Dataverse process; do not delete.

Related business records

Related record	Relationship to this screen
Manager	Another Employee selected through the standard reporting relationship.
Position	Defines the Employee's organizational role.
Department	Defines the Employee's organizational unit.
Personal HR records	Time Off Balances, Time Off Requests, Expense Reports, and Benefit Enrollments reference the Employee.

Worked example

The following fictional Employee record demonstrates a complete business scenario.

Field	Example value
Employee	Avery Chen

Field	Example value
Employee ID	E-10482
Primary Email	avery.chen@example.com
Hire Date	July 20, 2026
Employment Type	Full Time
Department	Product
Position	Senior Designer
Manager	Morgan Lee
Enabled	Yes

Questions users commonly ask

Question	Business answer
Why is the Manager important?	Approval routing for Time Off Requests and Expense Reports derives from the Employee's Manager relationship.
Can I create an Employee manually?	Only through the approved identity and Dataverse administration process. Search for an existing User first.
What happens when an Employee leaves?	Complete handoffs, then disable the User. Historical HR transactions remain linked to that Employee.

Data quality and privacy checks

- Confirm that the record belongs on the Employee screen and is not a duplicate or a different business concept.
- Use approved lookups and choice values instead of typing alternative labels into notes.
- Enter only the minimum personal or financial information required for the business process.
- Preserve status and historical records; do not silently overwrite completed business events.
- When escalating an issue, share the record URL/ID and field name—not unnecessary sensitive field contents.

Companion process documentation

Use this entity help together with: HR-Agent-Sidecar-Employee-and-Organization-Process.pdf. The process document explains sequencing, responsibilities, approvals, exceptions, and cross-entity effects.

Agent response boundary

What the contextual agent should do

Answer in business terms for a user currently viewing Employee. Explain field meaning, proper use, related records, validation, and the applicable business process. If a question requires organization-specific policy, access rights, or confirmation that automation is deployed, state that limitation and direct the user to the appropriate HR or Power Platform owner.
