

Time Off Type Help

Business guidance for the Time Off Type screen

Screen context	Value
Business entity	Time Off Type
Dataverse logical name	maftagsc_timeofftype
Domain	Time Off
Ownership / sensitivity	Organization-owned reference data

Purpose

Defines an organization-approved category of leave, its standard annual allowance, and whether Manager approval is required.

All names, dates, amounts, and identifiers in examples are fictional and intended for training.

Understanding Time Off Type

Defines an organization-approved category of leave, its standard annual allowance, and whether Manager approval is required.

Use this screen when

- Introducing a governed leave category
- Providing a Time Off Type for balances and requests
- Changing future default annual hours or approval behavior

Do not use this screen to

- Do not create one Type per Employee
- Do not use a Type to store an annual balance
- Do not rename an existing Type to represent an unrelated policy

Contextual agent grounding

When entityName is “maftagsc_timeofftype”, treat this document as the primary entity-specific source. Use it together with HR-Agent-Sidecar-Time-Off-Process.pdf. Do not infer that planned Model-driven App automation, security roles, or the Copilot side pane are deployed until implementation is confirmed.

Who does what

Business role	Responsibility on this screen
HR administrator	Creates and maintains approved Time Off Types.
Process owner	Approves policy, allowance, and approval behavior.

Business field guide

Field	Business meaning	How to use it
Time Off Type Name	Business name of the leave category.	Use a clear name such as Vacation.
Code	Stable short identifier.	Required; use an approved unique code such as VAC.
Default Annual Hours	Standard annual allocation.	A reference default; individual balances may be prorated.
Requires Approval	Whether requests normally	Required; defaults to Yes.

Field	Business meaning	How to use it
	require a Manager decision.	
Status	Whether the Type is available for use.	Deactivate retired Types; do not repurpose them.

Related business records

Related record	Relationship to this screen
Time Off Balance	Balances are maintained by Employee, Type, and Calendar Year.
Time Off Request	Each request selects one Type.

Worked example

The following fictional Time Off Type record demonstrates a complete business scenario.

Field	Example value
Time Off Type Name	Vacation
Code	VAC
Default Annual Hours	120.00
Requires Approval	Yes
Status	Active

Questions users commonly ask

Question	Business answer
Does changing Default Annual Hours update existing balances?	Not automatically. It is a reference default; apply governed annual setup or adjustment rules.
When should Requires Approval be No?	Only for categories explicitly authorized for automatic handling.
Can I reuse a retired code?	Avoid reuse because historical records must keep a stable business meaning.

Data quality and privacy checks

- Confirm that the record belongs on the Time Off Type screen and is not a duplicate or a different business concept.
- Use approved lookups and choice values instead of typing alternative labels into notes.
- Enter only the minimum personal or financial information required for the business process.
- Preserve status and historical records; do not silently overwrite completed business events.
- When escalating an issue, share the record URL/ID and field name—not unnecessary sensitive field contents.

Companion process documentation

Use this entity help together with: [HR-Agent-Sidecar-Time-Off-Process.pdf](#). The process document explains sequencing, responsibilities, approvals, exceptions, and cross-entity effects.

Agent response boundary

What the contextual agent should do

Answer in business terms for a user currently viewing Time Off Type. Explain field meaning, proper use, related records, validation, and the applicable business process. If a question requires organization-specific policy, access rights, or confirmation that automation is deployed, state that limitation and direct the user to the appropriate HR or Power Platform owner.
